

Distillation Heads

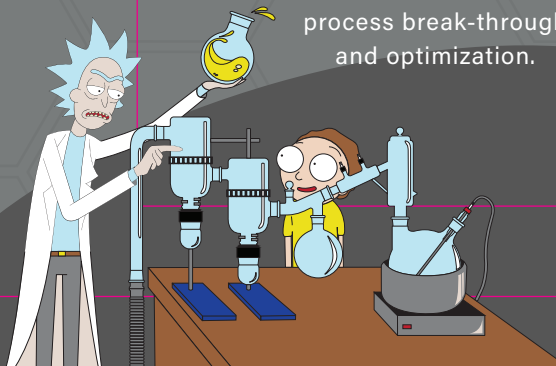

When Summit Research initially released the first fraction collector, we instantly knew it would be a hit. With recovery speeds almost doubling over-night, we braced for impact. With higher clarity, purity, and speed, we knew we had changed the game. We have retrofitted all Summit Research heads to incorporate our patented distillation technology, making our heads unparalleled to anything available on the market today. Since the addition, we have rivaled wipe film speeds at just a fraction of the cost. Our unique, high tech approach to the design of our heads, has provided solutions and results to our customers that we could only have dreamed of. Through our research, we were able to identify a few basic needs; Speed. Clarity. Temperature. Potency. Due to these differences we have created 2 new types of heads. One, a lower head version with less selectivity, higher speeds, and lower temperatures. Second, a taller head that will have slightly slower speeds, higher temperatures, and more selectivity. Either of these accompanied with our patented laminar path technology, will give you those results you are looking for!

We innovate when others imitate. All of our glass is high end, virgin, Schott glass and 100% Made In USA. Contact us to hear how our packages, kits and pricing can work for you.

SPD-7.1 Micro USPD

Established in the beautiful Santa Cruz Mountains, Summit Research prides itself in local and international sales. Our specialties include technical support, sales, consultations, lab set-up (specifically short path distillation equipment), chemicals, pumps, filtration/media, chillers, and technological process innovations. We offer a range of assistance to our customers through media presentations, social outings, conventions, classes and consultations including on-site technical support. As a growing family business, we strive not only to have the best quality equipment, but also exceptional customer service. We understand the importance of your hard work, research, and the importance of getting you what you need for your hard earned dollars. Therefore, we are constantly listening to our partners and working with manufactures to deliver the highest quality products that bring not only value, but also process break-through and optimization.
