

Gauges, Valves & Controllers

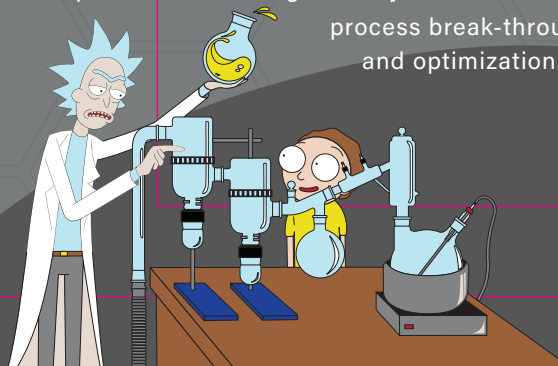

Summit Research develops and markets top of the line optical/metro-logical technology and digital based products for botanical research and development. Ultimately helping extraction processing facilities to improve process efficiency. Using these identifying tools results in **Only The Best** quality targeted materials such as plant extract, specifically distillates. We constantly build and innovate devices that are key in the telemetry of the success in these critical processes. We work directly with distributors who ship with near zero defect while shipping 99% on time. The constant hard work, dedication, and customer service is why Summit chooses DigiVac and Arometrix for all your sensing needs. Contact us info@summit-research.tech

Fraction Finder

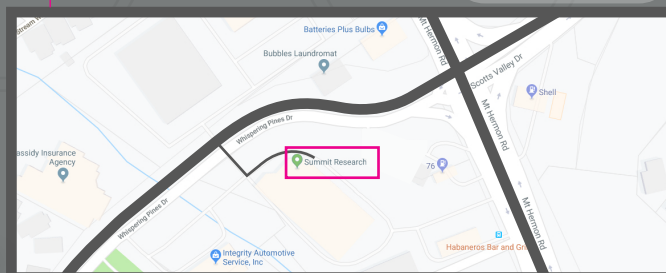

Established in the beautiful Santa Cruz Mountains, Summit Research prides itself in local and international sales. Our specialties include technical support, sales, consultations, lab set-up (specifically short path distillation equipment), chemicals, pumps, filtration/media, chillers, and technological process innovations. We offer a range of assistance to our customers through media presentations, social outings, conventions, classes and consultations including on-site technical support. As a growing family business, we strive not only to have the best quality equipment, but also exceptional customer service. We understand the importance of your hard work, research, and the importance of getting you what you need for your hard earned dollars. Therefore, we are constantly listening to our partners and working with manufactures to deliver the highest quality products that bring not only value, but also

process break-through and optimization.
